PROFESSIONAL SUMMARY

Software Developer with industry experience in Salesforce development and proven ability to design, build, and deploy applications end to end. Strong in Java, Spring Boot, REST APIs, SQL, and Data Structures and Algorithms. Built Skoolora, a live multi-school attendance platform with role-based access and subscription-tier features, currently piloting in a school. Seeking a Software Developer role to deliver scalable, production-ready software.

SKILLS

- **Programming:** Java, SQL, Python
- **Salesforce:** Apex, Lightning Web Components (LWC), SOQL, Flows
- **Backend & Databases:** Spring Boot, REST APIs, JPA / Hibernate, MySQL, PostgreSQL, JDBC
- **Web:** HTML, CSS, JavaScript, React
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks
- **Tools:** Git, GitHub, Postman, VS Code
- **Cloud & Deployment:** Railway, AWS Cloud Practitioner (certified)

EXPERIENCE

360 Degree — Junior Salesforce Developer | Mar 2026 – Present

- Develop and enhance features for an SMS application on the Salesforce platform.
- Deliver features end to end, from requirement understanding to testing, and fix bugs to improve existing functionality.
- Collaborate with the team using version control and code reviews.

SalesQueen Software Solution — Frontend Developer Intern | May 2024 – Jul 2024

- Developed responsive frontend interfaces using HTML, CSS, and JavaScript.
- Collaborated with a team of 4 developers to build an e-commerce platform with integrated APIs.
- Improved page load speed by 30% through code refactoring and image optimization; used Git for version control.

PROJECTS

Skoolora | School Attendance Management System | Spring Boot, PostgreSQL, React, Railway | app.skoolora.co.in

- Designed, built, and deployed a live multi-school attendance platform on Railway with role-based access for Super Admin, Admin, Teacher, Student, and Parent.
- Built workflows where Super Admin onboards schools and admins, and admins manage classes, students, and teachers.
- Implemented subscription-based access control: Basic (attendance), Plus (adds parent notifications), and Premium (adds parent login portal).
- Currently piloted in one school for real-world testing.

University Management System | Spring Boot, MySQL, REST API | [GitHub](https://github.com)

- Built a Spring Boot REST API backend with JPA/Hibernate and MySQL for student record management (CRUD), using Controller–Service–Repository architecture.
- Implemented exception handling and validation for robust request processing.
- Tested APIs with Postman and optimized database queries for better performance.

Financial Portfolio Tracker & Risk Analyzer | Python, Streamlit, SQL | [Live Demo](#)

- Built a Python web app to analyze investment portfolios and calculate risk using weighted-average methods.
- Created interactive Streamlit dashboards with volatility analysis for data-driven insights.

EDUCATION

B.Tech in Computer Science — Sharda University | Sep 2022 – May 2026

CGPA: 7.8 / 10

ACHIEVEMENTS & CERTIFICATIONS

- Solved 300+ Data Structures & Algorithms problems on [LeetCode](https://leetcode.com) and [GeeksforGeeks](https://www.geeksforgeeks.com).
- Completed AWS Cloud Practitioner certification, covering cloud fundamentals and security basics.
